OFFICIAL SUPPLIER OF

WINTER 2017/18
PROFESSIONAL

■ CONCEPT ■

"FROM JAPAN TO THE WORLD"

The main theme of **ONYONE** is development of active wear by analyzing the movement with a scientific method.

ONYONE produces a wide range of different clothing from sports wear, special-purpose wear, to work wear worn in harsh climate.

ONYONE has built its ergonomic perspective by developing products in cooperation with top athletes.

Anyone has accumulated experience and technology for manufacturing special-purpose clothes.

■ OUR TEAM ■

ECOLE NATIONALE DES SPORTS DE MONTAGNE (ENSM)

The unique provider in France of professional training for alpine and nordic ski instructors, mountain guides, mountain leaders, hang-/paragliding instructors. It's also an institute, which unites 2 historical and unique sites: ENSA in the north Alps in Chamonix and CNSNMM in the Jura in Prémaman.

SWISS SNOWSPORTS DEMO TEAM

SWISS SNOWSPORTS/DEMO TEAM

It's a governing body for ski schools and snowsport instructor training in Switzerland. The Swiss Snow Demo Team is the ambassadors of the Swiss winter.

Federació Andorrana d'Esquí (FAE)

Ski Federation of Andorra. It's a group of young and talented athletes competing in the alpine skiing world cup.

TEMPERATURE CONTROL SYSTEM

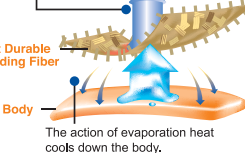

Small amount of perspiration Heat up

A special powder is integrated around the fiber in molecular level. It generates heat when absorbing moisture.

Large amount of perspiration Cool down

As the greater moisture is produced, the moisture is released giving a cooling down effect.

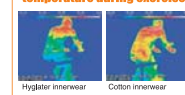

Hyglater keeps you dry.

At the start up of the sporting activity, the special powder reacts to the moisture from perspiration and generates heat. This heat warms up the human body fast and gives better condition for the physical movement.

On the contrary, as soon as the greater moisture is produced, the special powder reacts and starts to cool down.

The cooling down effect enables the human body to continue the sporting activity in the comfortable condition.

Thermograph comparison of Hyglater innerwear and cotton innerwear surface temperature during exercise

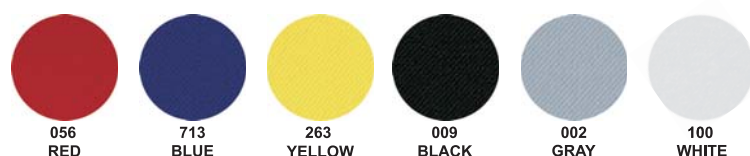

Hyglater

3D CUTTING /LIGHTWEIGHT TECHNOLOGY

3-dimensional cutting technique

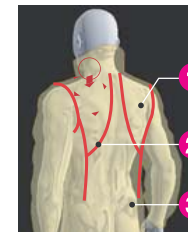

An analysis of the human body has been conducted by viewing its shape, movement and silhouette. From this analysis, we have developed a special 3-dimensional cutting allowing all movements in the high level.

LIGHTWEIGHT TECHNOLOGY

Reduces stress for better comfortability.

- 1 Weight and feeling of heaviness of the clothing are stress for the athletes and they can disturb their concentration and sustaining power.
- 2 Lightweight technology is a special system, which reduces the actual weight of the clothing and also improves the feeling of heaviness
- 3 The main concept of this system is to reduce stress for better comfortability.

PERFORMANCE

ICON CHART

Temperature control system. Hyglater controls the temperature of your skin and muscle.

The stretchable fabric supports your body movement and gives you comfortable fitting.

RECCO® technology makes you searchable in the event of an avalanche accident. RECCO® reflectors enable professional rescuers to rapidly pinpoint a buried person's location using the RECCO® detector. Reflectors are not a substitute for transceiver use. Complementary in function, the RECCO technology increases the chance of being found in time.
