OFFICIAL SUPPLIER OF

■ CONCEPT ■

"FROM JAPAN TO THE WORLD"

The main theme of **ONYONE** is development of active wear by analyzing the movement with a scientific method.

ONYONE produces a wide range of different clothing from sports wear, special-purpose wear, to work wear worn in harsh climate.

ONYONE has built its ergonomic perspective by developing products in cooperation with top athletes and national organizations.

Anyone is providing special-purpose clothes to the world with its experience and technology.

■ OUR TEAM ■

Ecole du Ski français (ESF)

Ecole Française de Ski, the forerunner of the Ecole du Ski Français was founded in 1937 with its aim in unifying ski instruction in France. From 1945 to today, the size of Ecole du Ski Français has increased from 200 instructors in 41 schools to 17,000 instructors in 250 offices. Today, the Ecole du Ski Français is the largest ski school in the world, with 2,000,000 pupils taking 800,000 tests every year.

ECOLE NATIONALE DES SPORTS DE MONTAGNE (ENSM)

The unique provider in France of professional training for alpine and nordic ski instructors, mountain guides, mountain leaders, hang-/paragliding instructors. It's also an institute, which unites 2 historical and unique sites: ENSA in the north Alps in Chamonix and CNSNM in the Jura in Prémamanon.

Federació Andorrana d'Esquí (FAE)

Ski Federation of Andorra. It's a group of young and talented athletes competing in the alpine skiing world cup.

TEMPERATURE CONTROL SYSTEM

Small amount of perspiration Heat up

A special powder is integrated around the fiber in molecular level. It generates heat when absorbing moisture.

Large amount of perspiration Cool down

As the greater moisture is produced, the moisture is released giving a cooling down effect.

Hyglater keeps you dry.

At the start up of the sporting activity, the special powder reacts to the moisture from perspiration and generates heat. This heat warms up the human body fast and gives better condition for the physical movement.

On the contrary, as soon as the greater moisture is produced, the special powder reacts and starts to cool down.

The cooling down effect enables the human body to continue the sporting activity in the comfortable condition.

Thermograph comparison of Hyglater innerwear and cotton innerwear surface temperature during exercise

Hyglater

COLOR ORDER SYSTEM / MARKING

CHOOSE YOUR FAVORITE COLOR!

All our products which are marked with the logo can be ordered in your favorite colors. The colors shown in this catalog are just a sample for reference. Please visit our webpage (<https://en.anyone.co.jp/>) to create your own design or get in contact with your dealer. Your dealer will support you to find your favorite design.

COLOR SIMULATOR

Pos. 2	xx cm	xx cm
Pos. 3	xx cm	xx cm
Pos. 4	xx cm	xx cm
Pos. 5	xx cm	xx cm

PRINTING, EMBROIDERY AND BADGES

We offer makings for your logos, logos of your sponsors or other requests as well. You will find the marking places on the design and also information about the max. size for each position. We offer printing, embroidery and badges.

Please contact your dealer for necessary information about the marking data.

COLOR RESISTANCE

COLOR RESISTANCE

ANYONE's exclusive color treatment allows our fabric to keep its original color after exposed to strong sunlight for long term usage. Each of our original fabrics is tested and fully controlled under our original testing method which has been developed under JIS (Japanese Industrial Standards).

- Regular color resistance - LEVEL 3~4

- High color resistance - LEVEL 6~7 ※

※ Cloth state after the seventh grade irradiation (160 hours)

SKI SCHOOL - OUTER SHELL -

LEVEL 6~7

SS STRETCH 2L/SS OXFORD 2L
Test method for color fastness to enclosed carbon arc lamp light (JIS L0842 1~8)

SKI CLUB - OUTER SHELL -

LEVEL 6~7

SS STRETCH 2L/SS OXFORD 2L
Test method for color fastness to enclosed carbon arc lamp light (JIS L0842 1~8)

SKI LIFT - OUTER SHELL -

LEVEL 6~7

SS STRETCH 2L/SS OXFORD 2L
Test method for color fastness to enclosed carbon arc lamp light (JIS L0842 1~8)

3D CUTTING /LIGHTWEIGHT TECHNOLOGY

3-dimensional cutting technique

An analysis of the human body has been conducted by viewing its shape, movement and silhouette. From this analysis, we have developed a special 3-dimensional cutting allowing all movements in the high level.

LIGHTWEIGHT TECHNOLOGY

Reduces stress for better comfortability.

- 1 Weight and feeling of heaviness of the clothing are stress for the athletes and they can disturb their concentration and sustaining power.
- 2 Lightweight technology is a special system, which reduces the actual weight of the clothing and also improves the feeling of heaviness
- 3 The main concept of this system is to reduce stress for better comfortability.

PERFORMANCE

ICON CHART

Temperature control system. Hyglater controls the temperature of your skin and muscle.

The stretchable fabric supports your body movement and gives you comfortable fitting.
