ONYONE

About us CONCEPT

FROM JAPAN TO THE WORLD

The main theme of ANYONE is development of active wear by analyzing the movement with a scientific method.

ANYONE produces a wide range of different clothing from sports wear, special-purpose wear, to work wear worn in harsh climate.

ANYONE has built its ergonomic perspective by developing products in cooperation with top athletes and national organizations.

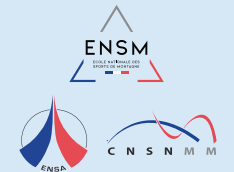

Anyone is providing special-purpose clothes to the world with its experience and technology.

esf

Ecole du Ski français (ESF)

Ecole Française de Ski, the forerunner of the Ecole du Ski Français was founded in 1937 with its aim in unifying ski instruction in France. From 1945 to today, the size of Ecole du Ski Français has increased from 200 instructors in 41 schools to 17,000 instructors in 250 offices. Today, the Ecole du Ski Français is the largest ski school in the world, with 2,000,000 pupils taking 800,000 tests every year.

ECOLE NATIONALE DES SPORTS DE MONTAGNE (ENSM)

The unique provider in France of professional training for alpine and nordic ski instructors, mountain guides, mountain leaders, hang-/paragliding instructors. It's also an institute, which unites 2 historical and unique sites: ENSA in the north Alps in Chamonix and CNSNM in the Jura in Prémamanon.

Federació Andorrana d'Esquí (FAE)

Ski Federation of Andorra. It's a group of young and talented athletes competing in the alpine skiing world cup.

TEMPERATURE CONTROL SYSTEM

Small amount of perspiration
Heat up

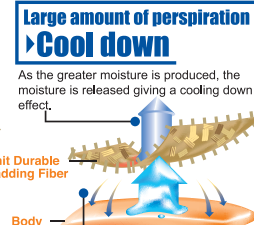

A special powder is integrated around the fiber in molecular level. It generates heat when absorbing moisture.

The fabric generates heat and warms the body.

Large amount of perspiration
Cool down

As the greater moisture is produced, the moisture is released giving a cooling down effect.

Knit Durable Padding Fiber

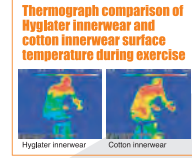

Body

The action of evaporation heat cools down the body.

Hyglater keeps you dry.

At the start up of the sporting activity, the special powder reacts to the moisture from perspiration and generates heat. This heat warms up the human body fast and gives better condition for the physical movement.

On the contrary, as soon as the greater moisture is produced, the special powder reacts and starts to cool down. The cooling down effect enables the human body to continue the sporting activity in the comfortable condition.

Thermograph comparison of Hyglater innerwear and cotton innerwear surface temperature during exercise

COLOR ORDER SYSTEM / MARKING

CHOOSE YOUR FAVORITE COLOR!

All our products which are marked with the  logo can be ordered in your favorite colors. The colors shown in this catalog are just a sample for reference. Please visit our webpage (<https://en.onyone.co.jp/>) to create your own design or get in contact with your dealer. Your dealer will support you to find your favorite design.

3D CUTTING /LIGHTWEIGHT TECHNOLOGY

3-dimensional cutting technique

An analysis of the human body has been conducted by viewing its shape, movement and silhouette. From this analysis, we have developed a special 3-dimensional cutting allowing all movements in the high level.

LIGHTWEIGHT TECHNOLOGY

Reduces stress for better comfortability.

- Weight and feeling of heaviness of the clothing are stress for the athletes and they can disturb their concentration and sustaining power.
- Lightweight technology is a special system, which reduces the actual weight of the clothing and also improves the feeling of heaviness
- The main concept of this system is to reduce stress for better comfortability.

PERFORMANCE

ICON CHART

Temperature control system. Hyglater controls the temperature of your skin and muscle.

The stretchable fabric supports your body movement and gives you comfortable fitting.
